

This document is fully synthetic and paraphrased; it does not reproduce any real standard's wording.

Clause 7.5 - Document control. Every controlled document shall carry a revision identifier and an effective date. Superseded revisions shall be withdrawn from points of use.

Clause 8.2 - Nonconforming output. Production lots whose first-pass yield falls below the documented release threshold shall be quarantined in a controlled hold area (at Plant 7, the 'dog house') pending disposition.
